

AD-IOT

Module for
Elevator
Monitoring

AD-IOT

Feature:

- **IoT module** ensures **reliability, efficiency,** and superior user **satisfaction in elevator operations.**
- **Advanced Authentication:** Secure login with Google and Facebook integration.
- **Real-Time Monitoring:** Live updates on elevator performance and status.
- **Error Alerts:** Automatic fault notifications for quick action.
- **Comprehensive I/O Tracking:** Monitors all input/output operations for insights.
- **Intuitive UI/UX:** User-friendly design for enhanced experience.
- **Call Monitoring:** Tracks and logs elevator call operations.
- **Performance Analytics:** In-depth metrics for efficiency optimization.
- **Energy Monitoring:** Tracks energy usage for cost and sustainability benefits.
- **High-Speed Updates:** Fast data refresh for accurate real-time monitoring.
- **Secure Database:** Optimized for data integrity and safety.
- **Ultra-Low Latency:** Rapid response times for seamless control.
- **Fault Notifications:** Direct alerts to up to five authorized mobile numbers.
